

BIOboard

Don't be Boring! Be Remarkable and Green!

BIOboard is a company with 10 years experience with green walls and green branding.

BIOboard is a worldwide manufacturer of green walls made of reindeer moss and preserved plants with offices and installation teams based in Sofia, Bulgaria at the service of customers in Eastern and Central Europe and Dubai, UAE - delivering service in the United Arab Emirates and other GCC countries.

MOSS walls by BIOboard are designed by a team of landscape architects and handcrafted to fit any interior by producing customized MOSS panels that are attached easily on all kinds of surfaces and walls. MOSS walls are distributed into separate pieces called MOSS panels by hand-packing them and shipping worldwide.

MOSS wild series - a piece of art from preserved moss&plants by BIOboard

100% natural - all preserved plants are real.
Preserved to last for years - natural plants have been treated with a special organic mixture to keep the leaves beautiful for years.
No maintenance and easy to install.
Cost effective - the preserved plants last for years and significantly lower the necessity for re-investment.

Preserved plants are NOT artificial - although the products are treated with special organic substances that stabilize the natural plant, our greenery do not consist any of the typical chemicals for the artificial plants such as plastics and any synthetic fabrics.
Preserved plants are NOT toxic.

MOSS design series - green walls from preserved moss made with love by BIOboard

Do not require maintenance.
Moss is NOT toxic and is NON-allergic.
Does NOT attract insects.
Non-flammable material.
Does NOT require special lighting. Can be used
in dark spaces like SPA zones and underground
rooms.
Should NOT be watered.

Does NOT absorb any smells.
Dust repellent material.
Becomes hard and brittle when the air in the
room is dry (under 50% humidity) and becomes
mild and fluffy again when humidity is over 50%.
Pleasant smell of Scandinavian forest.
One of the best sound absorbing materials.
Variety of colors.

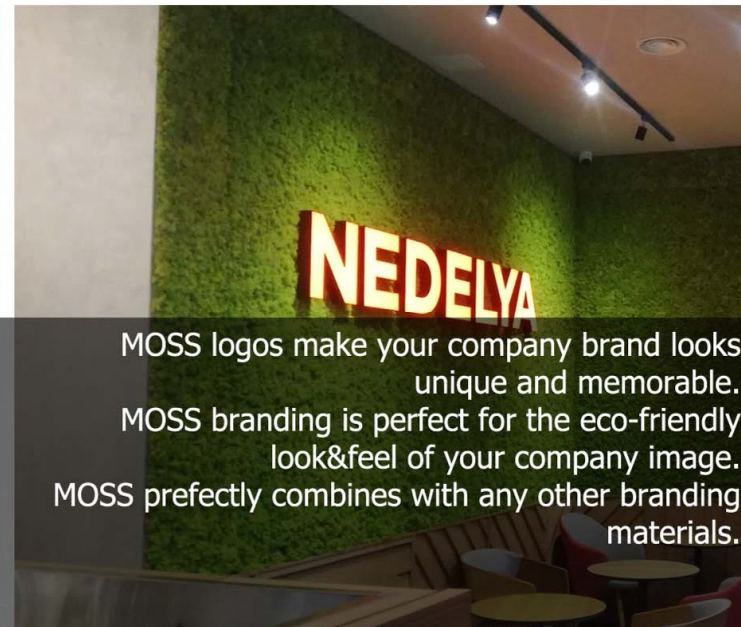

MOSS logos and green branding
by BIOboard

EUROIMPEX

WASTE MANAGEMENT

The interior decorative moss MOSS design by BIOboard, famous as reindeer moss, is a natural plant that grows in forest and mountain areas of the subarctic regions. MOSS by BIOboard comes from Norway. MOSS by BIOboard looks fresh and sustainable over the time and is perfect for any interior green branding and production of green logos.

MOSS logos make your company brand look unique and memorable. MOSS branding is perfect for the eco-friendly look&feel of your company image. MOSS perfectly combines with any other branding materials.
